## ADVANCED METHANE SENSING

Designed specifically for methane detection, the REP1512-DM-DX1, available in the 1640-1670nm range, combines RPMC's Discrete Mode (DM) technology with an integrated current driver and TEC controller to create an all-in-one sensing solution featuring excellent SMSR and mode-hop free tuning.

Optical Spectrum at 25°C

Output power (ex-fibre) as a function of bias current

### Laser Safety

This is a Class 3R Laser Product as defined by International Standard IEC 60825-1, Edition 2. Invisible Laser radiation is emitted from the end of the fiber or connector. Avoid direct eye exposure to the beam. Laser safety labels are not attached to the module due to space limitations but instead are affixed to the outside of the shipping carton.
